

Christ Amron A. Luzon

Entry-Level Software Engineer | Web Developer | QA Tester

christamron.luzon@gmail.com | +639058988372 | Cebu City, Philippines | christamronluzonportfolio.netlify.app

SUMMARY

IT graduate with 500+ hours of internship experience in full-stack web development and software QA testing. Hands-on experience with ReactJS, Express.js, PostgreSQL, Django, and Firebase. Experienced in building web application features, developing backend APIs, performing manual and functional testing, and tracking bugs. Looking for an entry-level Software Developer, Web Developer, or QA Engineer role.

SKILLS

Programming Languages: JavaScript, Python, Java, SQL, HTML5, CSS3

Frameworks & Libraries: ReactJS, Express.js, Node.js, Django, Tailwind CSS

Databases: PostgreSQL, MySQL, Firebase

Backend & APIs: RESTful APIs, JWT Authentication, bcrypt

Testing & Tools: Manual Testing, Functional Testing, Bug Identification & Tracking, Git, GitHub, VS Code

WORK EXPERIENCE

Software Developer Intern | Worldtech Information Solutions Inc.

Cebu City, Philippines | January 2026 – May 2026 (500 Hours)

- Worked on a full-stack Incident Response Tabletop Exercise (TTX) web app using ReactJS, Tailwind CSS, Express.js, and PostgreSQL.
- Built frontend components for game management, scoring, leaderboards, and threat scenarios, connecting them to backend REST APIs.
- Handled user authentication and data security using JWT, bcrypt, and middleware.
- Performed manual and functional testing on core features, logged bugs with steps to reproduce, and retested fixes before deployment.
- Participated in daily standups, code reviews, and sprint tasks as part of an Agile team setup.

PROJECTS

SpeakForge – AI-Powered English-Cebuano Translation System

Technologies: Django, Firebase, Android, LLM APIs

- Developed a split-screen translation app that uses LLM APIs to translate English to Cebuano.
- Set up Firebase for user auth and data storage, and debugged API responses for smoother translation flow.

Chatify - Real-Time Multilingual Messaging Application

Technologies: ReactJS, Firebase, AI Translation APIs

- Developed a real-time messaging app with Firebase Realtime Database and integrated AI APIs to automatically translate chat messages.
- Tested edge cases and UI responsiveness across different browser screen sizes.

EDUCATION

Bachelor of Science in Information Technology

Cebu Institute of Technology - University | Cebu City, Philippines

Graduated 2026
