

CHRIST AMRON A. LUZON

Entry-level Software Engineer | QA Tester | Web Developer

Cebu City, Philippines | christamron.luzon@gmail.com | +63 905 898 8372 | christamronluzonportfolio.netlify.app

PROFESSIONAL SUMMARY

BS Information Technology graduate with 500 hours of hands-on internship experience in web development and software testing. Built and tested web applications using React, TypeScript, Node.js/Express, and PostgreSQL. Experienced in REST API integration, form validation, manual and functional testing, debugging, and UI/user-flow testing. Familiar with Git-based team workflows and developing responsive web interfaces.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Vue.js, Tailwind CSS, shadcn/ui, Responsive Web Design

Backend: Node.js, Express.js, Django, REST APIs, API Integration, JWT Authentication

Database: PostgreSQL, MySQL, Firebase

Testing: Manual & Functional Testing, UI/User Flow Testing, Bug Identification, Debugging & Troubleshooting

Tools: Git, GitHub, Vite, VS Code, Postman, Swagger/OpenAPI

AI-Assisted Dev: ChatGPT, Claude, Google Gemini

EXPERIENCE

Software Developer Intern - Worldtech Information Solutions Inc. *Jan 2026 – May 2026*

Cebu City, Philippines · 500 Hours

- Built responsive React/TypeScript pages, forms, and interfaces for three internal platforms covering cybersecurity assessment, data privacy risk assessment, and incident response.
- Developed reusable UI components across multiple modules to maintain consistent layouts and reduce duplicate frontend code.
- Integrated frontend features with REST APIs and worked with backend developers to resolve authentication, data, and integration issues.
- Ran manual and functional tests on new features, documented UI and workflow bugs, and retested fixes before handoff.
- Used Git and GitHub for version control, pull requests, code reviews, and team collaboration.

PROJECTS

WIS - Incident Response Tabletop Exercise (TTX) | *Full-Stack Developer*

- Built a full-stack game management system using React, Node.js/Express, and PostgreSQL for threat scenarios, response cards, rounds, team scoring, and moderator controls.
- Implemented JWT authentication and PostgreSQL data handling, then connected the backend APIs to the React frontend.
- Tested user flows and debugged issues across API requests, backend responses, and frontend state during development.

WIS - NIST CSF Assessment Platform | *Frontend Developer*

- Built assessment, dashboard, results, and reporting interfaces using React, TypeScript, and Vite with shadcn/ui components.
- Added form validation and API-connected components for multi-step assessment workflows, including handling incomplete and invalid submissions.
- Tested assessment workflows end-to-end, documented frontend issues, and verified fixes with the team.

WIS - Data Privacy Risk Assessment | *Frontend Developer*

- Built compliance, risk, and reporting dashboards using React and TypeScript, including chart-based risk data visualizations.
- Developed responsive assessment and reporting interfaces using Tailwind CSS and shadcn/ui.
- Tested UI workflows against expected behavior and debugged issues found during QA testing

EDUCATION

Bachelor of Science in Information Technology

Cebu Institute of Technology – University | *Graduated June 2026*
